pH Reference Standard Solutions for calibration of pH instruments

We offer Standard Buffer solutions from pH 4.0 to pH 10.0 in practice 500 ml packs to 2.5 l packs. Complete range of our products are manufactured in accordance with our stringent Quality Assurance guidelines and are precise upto ± 0.01 pH. These buffers are essential for routine calibration of pH meter in order to obtain accurate readings.

These solutions are analysed in our ISO accredited calibration laboratory and are traceable to primary standard reference materials from NIST and every bottle is labeled with their own lot number and an expiration date. We also offer additional values and packaging sizes upon request.
