GREASKOT

Silicon Insulating Material

GREASKOT is non-grease-like silicone material that maintains its consistency across a wide temperature range of -40°C to $+350^{\circ}\text{C}$.

Features:

- Maintains consistency over a broad temperature range.
- Exhibits low volatility and a very low vapor pressure of the base.
- Possesses excellent chemical resistance.
- Provides reliable sealing ability under varying conditions.

Chemical Resistance:

GREASKOT demonstrates excellent chemical resistance across a broad spectrum of substances:

Inorganic Resistance:

- Aqueous acids
- Alkalis
- Inorganic salt solutions

Organic Resistance:

- Most vegetable oils
- Mineral oils
- Many organic compounds
- Common gases

Product Range:

Sr.No	Code	Packing
1.	0399200160	160 gm
2.	0399200060	60 gm

For bulk or large-pack-size, please contact us.
